

Algorithm Experiment Problem Set

Xiaodong Wang
(wangxd@fzu.edu.cn)
Department of Computer Science
Fuzhou University P.R.China
February, 2006

Chapter 1 Introduction

Problem 1.1 Counting

Problem 1.2 Dictionary

Problem 1.3 Divisors

Problem 1.4 Coin Array

Problem 1.5 Maximum Gap

Chapter 2 Recursion and Divide and Conquer

Problem 2.1 Pipeline

Problem 2.2 Majority

Problem 2.3 Post Office

Problem 2.4 Knight's Hamilton Tour

Problem 2.5 Half Multiset

Problem 2.6 Half Set

Problem 2.7 Soldiers

Problem 2.8 Permutation with Repetition

Problem 2.9 Lexicographic Order

Problem 2.10 Set Partition

Problem 2.11 Set Partition 2

Problem 2.12 Bicolor Towers of Hanoi

Problem 2.13 Standard 2×n Table

Problem 2.14 Integer Factorization

Chapter 3 Dynamic Programming

Problem 3.0 Independent Task Scheduling

Problem 3.1 Coin Changing

Problem 3.2 Relation Ordering

Problem 3.3 Counting Powers

Problem 3.4 Edit Distance

Problem 3.5 Pebble Merging

Problem 3.6 Number Triangles

Problem 3.7 Multiplication Table

Problem 3.8 Renting Boats

Problem 3.9 Car Traveling

Problem 3.10 Minimal m Sums

Problem 3.11 Circle Multiplication

Problem 3.12 Maximum Cube

Problem 3.13 Regular Expressions

Problem 3.14 Bitonic Tours

Problem 3.15 Maximum k Multiplications

Problem 3.16 Cheapest Shopping

Problem 3.17 Collecting Samples

Problem 3.18 Optimal Scheduling

Problem 3.19 String Comparison

Problem 3.20 k Median of Directed Trees

Problem 3.21 k Independent Median of Directed Trees

Problem 3.22 k Median of Directed Line

Problem 3.23 2 Median of Directed Line

Problem 3.24 Maximum Connected Component of Trees

Problem 3.25 k Median of Line

Problem 3.26 k Cover of Line

Problem 3.27 m Processors

Problem 3.28 Red Nodes of Red-Black Trees

Chapter 4 Greedy Algorithms

Problem 4.1 Lecture Halls

Problem 4.2 Optimal Merge

Problem 4.3 Program Storage

Problem 4.4 Optimal Program Storage

Problem 4.5 Program Storage

Problem 4.6 Optimal Services

Problem 4.7 Optimal Many Services

Problem 4.8 d Forest

Problem 4.9 Oiling Car

Problem 4.10 Interval Cover

Problem 4.11 Coin Changing

Problem 4.12 Delete Numbers

Problem 4.13 Maximum Sequence Differences

Problem 4.14 Nesting Boxes

Problem 4.15 Arbitrage

Problem 4.16 Booster Placement

Problem 4.17 Maximum Tape Utilization Ratio

Problem 4.18 Task Scheduling

Problem 4.19 N-nary Huffman Codes

Problem 4.20 N-nary Huffman Code Variations

Problem 4.21 Interval Intersections

Problem 4.22 Task Scheduling

Problem 4.23 Optimal Partitions

Problem 4.24 Optimal Partitions with Repetitions

Problem 4.25 Optimal Combinatorial Partitions

Problem 4.26 Planning Traveling

Problem 4.27 Robot Climber

Chapter 5 Backtracking

Problem 5.1 Subset Sum

Problem 5.2 Minimum Length Board Arrangement

Problem 5.3 Minimum Weight Machine Design

Problem 5.4 Maximum Preferences

Problem 5.5 No Separation Dictionary

Problem 5.6 No Sum Sets

Problem 5.7 Instant Insanity

Problem 5.8 Integer Transformation

Problem 5.9 Latin squares

Problem 5.10 Jewel Arrangements

Problem 5.11 Latin squares with Repetition

Problem 5.12 Maze of Romeo and Juliet

Problem 5.13 Work Assignment

Problem 5.14 Hi-Q

Problem 5.15 Pentominoe Configuration

Problem 5.16 Board Permutation

Problem 5.17 Optimal Scheduling

Problem 5.18 Computation without Priority

Problem 5.19 Museum Guards

Problem 5.20 Unique Museum Guards

Problem 5.21 2×2×2 Rubik's Cube

Problem 5.22 Rubik's Cube

Problem 5.23 24 Points

Problem 5.24 m Points

Problem 5.25 Railroad Cars

Problem 5.26 Railroad Cars with Many Holding Tracks

Problem 5.27 Tribe Troops

Problem 5.28 Corroded Expressions

Problem 5.29 Complete Circle Sequences

Problem 5.30 Discrete 01 Strings

Problem 5.31 Painting Robots

Problem 5.32 Subset Trees

Problem 5.33 0-1 Knapsack

Problem 5.34 Permutation Trees

Problem 5.35 General Search

Problem 5.36 Shortest Addition Chains

Problem 5.37 n^2-1 Puzzle

Chapter 6 Branch and Bound

Problem 6.1 Minimum Length Board Arrangement

Problem 6.2 Minimum Length Board Arrangement

Problem 6.3 Minimum Weight Vertex Cover

Problem 6.4 Maximum Cut

Problem 6.5 Minimum Weight Machine Design

Problem 6.6 Maximal Preferences

Problem 6.7 n Queens

Problem 6.8 Circle Permutation

Problem 6.9 Board Permutation

Problem 6.10 Optimal Scheduling

Problem 6.11 Computation without Priority

Problem 6.12 Museum Guards

Problem 6.13 Subset Trees

Problem 6.14 Permutation Trees

Problem 6.15 General FIFO Branch and Bound

Problem 6.16 Subset Trees

Problem 6.17 Permutation Trees

Problem 6.18 General Priority Branch and Bound

Problem 6.19 Knight's Tour

Problem 6.20 Push Box

Problem 6.21 Graph Transformation

Problem 6.22 Row and Column Transformation

Problem 6.23 n^2 Puzzle

Problem 6.24 The Most Distant State

Chapter 7 Randomized Algorithms

Problem 7.1 Modular Square Roots

Problem 7.2 Primality Testing

Problem 7.3 Set Equality

Problem 7.4 Inverse Matrix

Problem 7.5 Multiplication of Polynomials

Problem 7.6 Queen Control

Problem 7.7 3SAT

Problem 7.8 Combat Vehicles

Problem 7.9 Circle Permutation

Problem 7.10 Knight's Control

Problem 7.11 Attacking Knights

Chapter 8 Linear Programming and Network Flows

Problem 8.1 Pilot Match

Problem 8.2 Space Shuttle Experiments

Problem 8.3 Minimum Path Cover

Problem 8.4 Magic Balls

Problem 8.5 Round Tables

Problem 8.6 Longest Increasing Sequences

Problem 8.7 Exercise Data Bases

Problem 8.8 Motion Planning on Trees

Problem 8.9 Number Grids

Problem 8.10 Napkin Planning

Problem 8.11 Airlines

Problem 8.12 Software Patches

Problem 8.13 Space Shuttles

Problem 8.14 Rescue

Problem 8.15 Car Traveling

Problem 8.16 Number Trapezoids

Problem 8.17 Transportation

Problem 8.18 Assignment

Problem 8.19 Load Balancing

Problem 8.20 Deep-Sea Robots

Problem 8.21 Longest k Intersection Interval Set

Problem 8.22 Longest k Intersection Line Segment Set

Problem 8.23 Explore Mars

Problem 8.24 Peaceful Knights

Chapter 9 NP-Completeness and Approximation Algorithms

Problem 9.1 Approximation Algorithm for TSP

Problem 9.2 Approximation Algorithm for SAT

Problem 9.3 Approximation Algorithm for MAX-SAT

Problem 9.4 Approximation Algorithm for Subset Sum

Problem 9.5 Polynomial Approximation for Subset Sum

Problem 9.6 Linear Time Algorithm for 2SAT

Problem 9.7 Linear Time Implement of greedySetCover

Midterm Exam 1

Problem 1 Maximum Sequence Differences

Problem 2 Bitonic Tours

Problem 3 Optimal Scheduling

Midterm Exam 2

Problem 1 Pebble Merging

Problem 2 Integer Factorization

Problem 3 Oiling Car

Final Exam 1

Problem 1 Multiplication Table

Problem 2 Work Assignment

Problem 3 Pilot Match

Final Exam 2

Problem 1 k Median of Line

Problem 2 Graph Transformation

Problem 3 Maximum Cut
